GERMS: YOUR PROGNOSIS ISN'T PRETTY.

Founded in 1966, Bee Line Support provides comprehensive cleaning to hundreds of medical facilities daily. When your building houses patients, it's crucial that pathogens are squashed before they spread. That's why we use the highest infectious control standards in the industry.

WE DON'T JUST KILL BACTERIA. WE TEAR THEM FROM FLAGELLUM TO FLAGELLUM.

Our secret weapon? The VeriClean™ audit system. It ensures that germs can't hide from our cleaners, and we're the only company that audits to this degree in medical offices. Here's how it works:

- 1 Auditor applies fluorescent spray to areas that require cleaning.
- 2 Our cleaning team disinfects the area.
- 3 Auditor shines a black light on the cleaned space, revealing any missed spots.
- 4 Results are logged electronically, allowing us to ensure that disinfection is complete.

THESE AREN'T JUST CLEANING SUPPLIES. THEY'RE WEAPONS OF MASS DISINFECTION.

With patient health at stake, we take extra precautions to keep pathogens in their place. For example, we make sure that our microfiber rags are always sealed, separated and sanitized to prevent cross-contamination.

- ✦ 99.999% of common pathogens are killed in the laundering process.
- ✦ Rags are transported in closed containers to prevent bacteria from mobilizing.
- ✦ Laundering meets OSHA, CDC and Joint Commission infectious control standards.

GERMICIDE IS JUST THE BEGINNING.

In addition to comprehensive cleaning, we provide a variety of other facility services:

- ✦ 24/7 emergency services
- ✦ Maintenance services
- ✦ Floor care and matting
- ✦ Construction cleanup
- ✦ Full line of building supplies
- ✦ Engineering services
- ✦ Disaster restoration
