Zeev Walny (CEO)  
Surgical Care Affiliates

**"Bee Line is providing unbeatable service! I can confidently say they are achieving everything we would hope for and more!"**  
Rodney Reams (Office Manager)  
Alan Chen Surgical Associates

Experience why so many of Chicagoland's top surgery centers count on Bee Line Support for all of their cleaning and disinfection needs

### CMIP Certified Management for All Surgery Sites

Our CMIP certified management carries vast knowledge in microbiology, precautionary safety measures, and infection prevention throughout all stages of disinfection.

With this knowledge, our frontline is fully trained on post-op terminal cleaning with only the highest infectious control standards in the industry.

### Monitoring & Disinfection of High-Touch Points

We use a state-of-the-art monitoring system to record all high-touch surfaces throughout each room in order to ensure the space is completely and properly disinfected.

We train all cleaning staff about high-touch points and how to properly clean them in a surgery setting.

### Partner with ImageFIRST for Infection Prevention

We proudly partner with ImageFIRST Healthcare Laundry Specialists so that we can guarantee that our supplies are 99.999% clean of common pathogens, meet or exceed OSHA and CDC standards, and complies with The Joint Commission requirements. We make sure to keep our microfiber mops sealed, separated and sanitized to prevent cross-contamination.

### High-Level Black Light Auditing & Reporting

We are one of the few comprehensive cleaning companies to use High-Level Black Light auditing to fully ensure total disinfection of all surgery terminals.

Through thorough review and monitoring, we can guarantee that the space has been left spotless!
