

BEE LINE SAFETY TIP!

Electrical Safety

Safety Tips

- DO NOT unplug a cord by pulling from a distance, always disconnect a cord from the outlet by gripping the plug
- DO NOT use a cord which doesn't have a ground pin
- Minimize the use of extension cords if possible
- DO NOT use electrical equipment around water or wet surfaces
- If an electrical piece of equipment or cord feels hot, makes unusual noises, smokes or sparks; immediately take it out of service and report the issue right away
- Inspect cords and equipment regularly and report any damage
- Check to ensure cords are not in walkways which can create tripping hazards or can cause cords to be improperly removed from the outlet
- Never use electrical equipment that is wet or if your hands are wet
- Use only three pronged extension cords outside
- DO NOT place a cord under a carpet, through a doorway or anywhere that it can be stepped on and damaged
