

BEE LINE SAFETY TIP!

Eye Safety

- Look away when high dusting to prevent foreign objects from falling into the eyes

- Always wear the appropriate eye protection if required at the job site

Eye Injury First Aid

For debris in the eye: Don't rub the eye but flush it out with plenty of water. If the debris doesn't wash out and if the eye is red and painful, seek medical attention.

For chemicals in the eye: Flush the eye out with water, or clean it at an eye wash station. Open the eye as wide as possible and flush the eye with water for at least 15 minutes.

SAFETY FIRST!

Report all safety hazards to your Manager right away!
